EDUCATION

- Gurukul Kangri Deemed to be University — *Haridwar, India*
  Bachelor of Technology in Computer Science and Technology — 2023 - 2027

SKILLS

Technical: React.js, Node.js, Express.js, MongoDB, PostgreSQL, Supabase, Tailwind CSS, Artificial Intelligence & Machine Learning, Cloud Computing, Computer Vision

Tools: VS Code/Cursor, Git & GitHub, Chrome DevTools, Firebase, Figma

EXPERIENCE

YugaYatra Retail (OPC) Private Ltd — *Bangalore, India*
Software Engineer Intern — Sep 2025– Present

- Built a Power BI dashboard using automated GCP workflows, improving reporting efficiency by 50%.
- Forged strong stakeholder relationships by driving new initiatives, achieved project goals and annual renewals.
- Show qualities like problem solving, collaboration, planning, agile, productivity and communication.

IBM SkillsBuild — *Noida, India*
Artificial Intelligence & Machine Learning Intern — June 2024 – July 2024

- Developed AI solutions including a restaurant chatbot and Diabetes & Kidney Stone prediction models.
- Built and optimized ML models using data preprocessing and feature engineering for accurate predictions.
- Designed end-to-end AI workflows using IBM WatsonX for healthcare analytics.

PROJECTS

HelloAlex | Github | Live : *hello-alex-five.vercel.app*

- Built an AI voice support agent (Next.js, Express, Gemini) automating 80%+ queries.
- Implemented 4+ modules (intent, sentiment, orders/returns), improving resolution by 60%.
- Developed full-stack system with voice, dashboard, and cloud, supporting 100+ sessions.

Diabetes_Help | Github

- Built a full-stack healthcare platform with 3 user roles, enabling appointments and digital records.
- Developed using React (TypeScript), Tailwind CSS, and Supabase, managing 1000+ secure records.
- Designed a responsive system with real-time scheduling and dashboards, improving efficiency by 50%.

CERTIFICATIONS

- Cloud Computing Fundamentals – IBM SkillsBuild – August'25 *(link)*
- Developer and Technology Job Simulation - Accenture – December'24 *(link)*

ACHIEVEMENTS

- Architected and deployed scalable full-stack and AI-driven applications with secure cloud integration, automated CI/CD pipelines, and production-grade performance optimization on Vercel and modern CI/CD Workflows.
- Reduced deployment time and improved production stability through edge-based hosting and continuous delivery workflows.
- Contributed technical expertise in college-level events, enhancing their overall quality and impact.
- **Student Lead – RoboDynamics Club:** Led the Robodynamics Club, organizing technical workshops, robotics projects, and mentoring peers in automation and innovation.
